### Reach unit outing

Last December, the reach unit planned an outing for the learners at Buskett gardens. The aim of this outing was for the students to explore and attend new attractions, to explore the gardens and to take part in outdoor activities.

On the day, our learners were excited and were prepared to go on their outing. Once we arrived to the Buskett gardens we started on our walk. While on our walk we saw a different type of trees and leaves on the floor. We kept on walking to the picnic area so we could have our lunch. After the learner's had their lunch, we started our second activity which was the scavenger hunt. The learners were explained they had to look for acorns, twigs and leaves around the picnic area. During the scavenger hunt the learners picked quite a lot of acorns and they were proud that they found a lot. After the scavenger hunt, we had the last activity of the outing which playing football.

Through this outing the learners managed to experience a new place in Malta, and the beauty of Buskett Garden. The outing was also of a benefit for the learners as they worked on their gross motor skills, finer motor skills and were stimulated by nature which in the end was very relaxing for them.

This initiative has been carried out under the NextGenerationEU Programmes by means of Malta's Recovery and Resilience Plan.
